EXPERIENCE

GENERAL ASSEMBLY SOFTWARE ENGINEERING COURSE, Toronto, ON

Jun 2022 – Dec 2022

- Front-End Development
  - Create a responsive website using HTML to structure content, CSS to handle visual style, and JavaScript to develop interactive experiences.
- Full-Stack Development
  - Build web forms that collect user data for storage in a database (powered by Structured Query Language (SQL), MongoDB (noSQL), etc.).
  - Get acquainted with front-end templating and libraries like Bootstrap.
  - Incorporate authentication capabilities into sites and applications (i.e., user logins, encrypted passwords, etc.).
- Front-End Framework
  - Deploy robust, modern front-end frameworks (i.e., React, Angular, or Ember).
  - Incorporate new patterns into front-end architecture, including custom behaviors, clientside models and data binding, form validation, and state management.
- APIs and Full-Stack Development
  - Get acquainted with more back-end libraries, frameworks, and tools that incorporate powerful front-end technologies like AJAX (Asynchronous JavaScript and XML).
  - Discover how to integrate third-party APIs into websites and applications (e.g., Stripe).
  - Allow user login via token-based authentication and external accounts (i.e., social media, oAuth).
  - Organize effective team workflows with Git and GitHub, refining technical and interpersonal collaboration skills.
  - Explore advanced debugging, testing, and documentation techniques.
  - Learn to use data structures, including linked lists, stacks and queues, sets, and trees.
